DOB : 29/03/2013

Gunallo 130055 Testimonial

2014 sees KP37 produce another high ranker in **Gunallo 055** that will attract the attention of the progressive breeder in need of maintaining a quality flock as well as the show ring circle due to his outstanding 'great on all fours' stature and meat/fibre component.

At 18.7u 3.3sd 17.6cv & 0.2pf and supported by a lustre, softness and whiteness in tandem with huge fleece weight potential, I can recommend the inspection of **Gunallo 055**. His ability to cut into old fashioned stud antics in all states as well as satisfying those who have already conquered *that* quest puts this bloke into SuperSire status without question.

Bill Walker – Director – Classings P/L
